

The Self-Service Cloud Solution for collaboration, storage, workflow and communication

**SHARE INFORMATION, MANAGE
YOUR WORKFLOW, COLLABORATE
ANYTIME AND ANYWHERE**

DOCUMENT SHARING,
WORKFLOW MANAGEMENT,
FAXES AND MUCH MORE IN A
SINGLE SOLUTION

Genialcloud Facsys is the cloud self-service solution for collaboration, storage, workflow and communication, that includes Document Management Enterprise tools.

KEY BUSINESS BENEFITS

Cloud application

Innovative Cloud solution deployed with the most recent technology. Accessible from the main browsers and devices including mobile.

Self-service modular platform

A full set of Self-Service modules that can be individually purchased and fully integrated. Login, select the application modules, and start using them.

Flexible configuration settings

Configurations available on Public Cloud, Private Cloud, and On Premise. You can easily switch configurations according to your need.

Content at your fingertips

Get key information with one click. Improve your company's decision-making process.

Enterprise document security

Ensure document integrity and retention to meet your compliance requirements.

Paperless office

Save time and money sharing your documents online.

Online Fax

Manage all your company's faxes. Get the powerful functionality of a fax server with no purchasing and maintenance commitment.

Optimized processes and workflows

Improve your company's operations and processes. Implement efficient workflows and effective digital asset management.

Sharing and collaboration

A quick and easy way to share and collaborate with no IT involvement.

SIMPLIFY COLLABORATION EVERYWHERE YOU ARE

A full set of independent and Self-Service applications perfectly integrated with each other.

100% Self-Service solution available on Private and Public Cloud, and On Premise.

Our cloud services are delivered through our data centers located in Europe and, thanks to partnerships with the main cloud providers, through specialized data centers located in Canada and worldwide.

Genialcloud Facsys is actionable with a number of components that can be selected as desired, usable in self-service mode and that integrate seamlessly with each other

AVAILABLE ON
CLOUD AND ON
PREMISE

SELF SERVICE,
CONSUMPTION
BASED

WORKS ON ANY
DEVICE

Genialcloud Facsys, thanks to its web interface, works on any browser, any operating system, and any device. Also, thanks to its iOS and Android apps, it is available on any mobile platform.

Available on the cloud, completely self service, Genialcloud Facsys can also be deployed locally (On Premise). Cloud services are available directly through a network of certified data centers in Italy, Canada and around the world, both in public and private mode.

Applications are natively designed with a HTML web interface, running on any browser and operating system, for both computers and for mobile devices, with an interface that automatically adapts to the device resolution (computer, smartphone or tablet) and native extensions of mobile apps for iOS and Android.

SOCIAL COLLABORATION

- Shared work areas (Social Space)
- Annotations and comments on documents

FACSYS COLLABORATION

Facsys Collaboration is the component for document management. It integrates synchronization, collaboration and company information sharing, together with traditional tools for document management.

Provides a centralized and shared repository for managing information, metadata, full-text indexes, tags, checkin / checkout, file versioning, complete search, permission management, publishing and archiving functionalities. Local and remote users can easily share content and track usage and changes to documents. Create a collaborative environment where people can securely store, share and exchange structured business information, regardless of format.

Manages documents and all types of content, ensuring quick access to a single updated version.

Share and collaborate quickly and easily protecting your assets with the best security systems.

ONE COPY - ALWAYS SYNCHRONIZED
Thanks to the synchronization functions, user files are automatically synchronized on PCs, laptops and mobile devices, making files always accessible and ensuring version control.

IT TAKES PAPER AND ELECTRONIC CONTENTS FROM EVERY SOURCE AND IT USES THEM TO FEED THE DIGITAL BUSINESS

FACSYS SECURE STORAGE

Facsys Secure Storage ensures document integrity and authenticity requirements are met according to your company's needs and national legislation.

- Manage you document storage, offline backup, digital signature, document expiration date, and cryptography
- Certify your document integrity and authenticity with the digital signature
- Ensure your document's integrity and security with the modern software

FACSYS SCANSTATION PRO

Facsys Scanstation Pro manages images and metadata acquisition through scanner, filesystems, OCR, and barcode.

It is compatible with most professional scanner drivers, scanners, multifunction printers, copy machines, and fax server.

- Improve your company's productivity and efficiency by scanning documents with OCR, ICR, and Barcode identification
- Increase your information security and the compatibility with your document management processes

DIGITALIZE YOUR PAPER

- Automatically find and sort your scanned documents by referencing the bar codes, patch codes, text content, and document layout
- Index your documents through key information useful for your next data processing
- Categorize, publish, and share documents according to their metadata
- Set several tuning parameters for scanning and OCR

FACSYS WORKFLOW

Facsys Workflow helps your organization to improve your operations, monitor your processes, and to make your business more efficient.

Facsys Workflow that can be easily integrated with third-party solutions, has a simple interface where users can set and quickly deploy business processes with no need of technical skills.

- Implement efficient workflows for integrated and effective file management within your organization
- Set, create, manage and monitor your business processes
- Update all the users about the status of the workflow
- Web and Email based file approval and reject process
- Based on the user(s) decision, files can be moved to different destinations
- Customized Web design, accessible from the main browsers and devices including mobile
- Real time monitoring of any workflow process and status, through user-friendly dashboards and reports
- Through the combination of few simple predefined and flexible elements, users can easily manage complex operations
- Integrate Facsys Workflow with Genialcloud Suite and third- party solutions
- Predefined activities and tasks, such as email notifications, user confirmation, and automatic verification of any information from an application, to meet the most common process management needs.
- Independently implement complex modelling of the workflow process
- Audit system available to ensure that your company's processes meet the legislation requirements

FACSYS FAX

Manage all of your incoming and outgoing corporate fax communication.

Automate the flow of fax messages directly to mailboxes, network folders, and user's repository without routing to third-party servers, ensuring the highest level of security for confidential documents.

USE THE POWERFUL FEATURES OF A FAX SERVER WITHOUT BUYING OR MAINTAINING IT.

- Enable your organization to be in compliance with HIPAA regulations
- Active Directory (AD) authentication
- Instant fax status notifications
- Complete audit trail of system and user activities
- Full integration with Microsoft Office Suite
- Fully featured web client
- Automatic route based on workflow, recognized (OCR'd) text, barcode, line routing, DID, DNIS, CSI, ANI, and Caller ID
- Physical and virtual deployment
- Full support for traditional fax line and fax over IP communication

CHANNEL CONNECTOR

Connect with the telephone channel to send and receive faxes. You can set different channels (analogic, digital, FoIP-Fax over IP).

MFP CONNECTOR

Connect to integrate FAX and the multi-function printers. A connector includes up to 10 MFP connections per server.

OFFICE 365 CONNECTOR

Integrate FAX with the Microsoft Office 365 email cloud provider. Send and receive faxes through an email account configured on Outlook 365.

Genialcloud is a self service cloud Business Productivity Suite that helps you drive real results within your organization.

An industry first solution, and fully available on the cloud, Genialcloud offers business tools that are key drivers for efficiency and productivity.

Avantune is the inventor of the self-service cloud. Thanks to Powua, a self-service cloud enablement platform, and Genialcloud, a self-service business suite, it is now possible to cut the complexity and costs of infrastructures and technological resources. It's also possible to increase efficiency and productivity of the organizations, enabling employees to collaborate remotely.

With headquarters in Toronto, the company also operates in Italy, United States and Mexico.

Avantune: Innovation without complexity.
